(54) Title: PROCESS FOR THE PRODUCTION OF COMPOSITIONS CONTAINING RIBONUCLEOTIDES AND THEIR USE AS FLAVOURING AGENTS

(57) Abstract: The present invention describes a process to produce a composition containing 5'-ribonucleotides wherein a microorganism is subjected to autolysis under conditions at which a substantial part of the RNA remains in a form degradable into 5'-ribonucleotides and at which a substantial part of the RNA remains associated with the cell wall fraction. Said cell wall fraction is recovered by a solid/liquid separation method and the RNA associated with said wall fraction is converted into 5'-ribonucleotides. The present invention also describes compositions containing 5'-ribonucleotides and their use in food or feed.
